

Stock Manipulation Types:

1. Pump and dump schemes
2. Dump and crash schemes
3. Spoofing (fake large buy/sell orders)
4. Layering (multiple fake orders)
5. Wash trading (buying/selling to self)
6. Matched orders (two parties pre-arranged trades)
7. Insider trading
8. Front running
9. Bear raid (forcing panic sell)
10. Cornering the market
11. Short and distort
12. Rumor spreading / fake news
13. Social media hype campaigns
14. Paid influencer promotions
15. Telegram/WhatsApp tip groups
16. Circular trading
17. Price rigging at close/open
18. Marking the close
19. Quote stuffing
20. High-frequency manipulation
21. Momentum ignition
22. Stop-loss hunting
23. Liquidity trapping
24. Fake breakout creation
25. Gap-up trap
26. Gap-down trap
27. Penny stock promotion scams
28. Shell company stock pumping
29. Reverse merger hype scams
30. Fake acquisition news
31. Fake earnings guidance
32. Accounting fraud
33. Revenue inflation fraud
34. Hidden debt fraud
35. Share buyback manipulation narratives
36. Dividend announcement traps
37. Bonus/share split hype manipulation
38. Rights issue misuse
39. Preferential allotment abuse
40. Promoter pledge hiding
41. Operator-driven price movement
42. Cartel trading groups

43. Cross-market arbitrage manipulation
44. Derivatives-based manipulation
45. Options gamma squeeze engineering
46. Short squeeze engineering
47. Long squeeze engineering
48. Index inclusion/exclusion speculation manipulation
49. ETF flow manipulation
50. Low-float stock manipulation
51. Free-float reduction tactics
52. Illiquid stock price steering
53. Dark pool abuse
54. Foreign fund coordinated moves
55. Currency-linked stock manipulation
56. Commodity-linked stock manipulation
57. Merger rumor manipulation
58. Bankruptcy rumor manipulation
59. Analyst rating collusion
60. Fake research reports
61. Media collusion campaigns
62. Broker recommendation scams
63. Churning by brokers
64. Unauthorized trading in client accounts
65. Margin call cascade triggering
66. Leveraged buying frenzy creation
67. Panic selling creation
68. Fear/greed sentiment engineering
69. Bot-generated market sentiment
70. AI/deepfake CEO statements
71. Fake SEC/regulator notice scams
72. Dividend capture hype scams
73. IPO listing day rigging
74. SME/small-cap manipulation
75. Pre-market manipulation
76. After-hours manipulation
77. Tick size exploitation
78. Latency arbitrage abuse
79. Cross-border rumor arbitrage
80. Corporate governance deception
81. Hidden related-party deals
82. Shareholding disclosure delay misuse
83. Earnings leak manipulation
84. Block deal signaling manipulation
85. Anchor investor exit traps
86. Retail trap rallies

87. Dead cat bounce traps
88. Value trap narrative manipulation
89. Technical chart pattern fabrication
90. Fake support/resistance walls
91. Synthetic volume creation
92. Order book imbalance deception
93. Repeated circuit-limit hitting
94. Freeze quantity abuse
95. Nominee account networks
96. Benami/proxy account trading
97. Tax-loss harvesting distortion
98. Regulatory loophole exploitation
99. Sector rotation rumor manipulation.
100. Macro event narrative manipulation

Data Sources for Detecting Stock Market Manipulation:

1. Exchange order book data – spoofing, layering, fake walls, liquidity traps, wash trades
2. Time & sales / tick-by-tick trade data – wash trading, matched orders, circular trades, momentum ignition
3. Intraday price-volume charts – pump & dump, dump & crash, stop-loss hunting, fake breakouts
4. Delivery percentage data – operator moves, intraday circular trades, fake volume creation
5. Bulk deal reports – cartel entries/exits, block signaling, promoter-linked trades
6. Block deal disclosures – hidden stake transfers, anchor exits, coordinated selling
7. Insider trading disclosures – insider trading, promoter offloading
8. Shareholding pattern filings – stealth accumulation, free-float reduction, pledge hiding
9. Promoter pledge data – distress selling risk, hidden leverage manipulation
10. Corporate announcements – fake acquisitions, buyback hype, dividend traps
11. Earnings reports – revenue inflation, accounting fraud, guidance manipulation
12. Auditor reports / resignations – fraud warning, hidden liabilities
13. Annual reports – governance deception, related-party abuse
14. Exchange surveillance notices – unusual volume, circuit manipulation, suspected operators
15. ASM/GSM lists (India) – speculative manipulation risk, abnormal price action
16. SEBI / SEC enforcement orders – confirmed manipulation cases, insider trading, cartels
17. Court filings / litigation – fraud, accounting scams, governance issues
18. News wires (Reuters/Bloomberg etc.) – rumor spikes, merger hype, regulatory shock moves
19. Social media (X, Telegram, Reddit, WhatsApp) – pump groups, coordinated hype, fake sentiment
20. YouTube finance channels – paid promotion, penny stock hype, misleading narratives
21. Influencer disclosures / sponsorships – paid pumping campaigns
22. Broker research reports – analyst collusion, target-price driven hype
23. Unusual options flow data – gamma squeeze, short squeeze, derivatives manipulation
24. Short interest data – short squeeze engineering, bear raids
25. Futures open interest – leveraged operator positioning, directional traps
26. Put-call ratio shifts – sentiment manipulation, options crowding
27. Dark pool / off-exchange data – hidden accumulation/distribution
28. ETF inflow/outflow data – ETF flow manipulation, basket moves
29. Index rebalance calendars – inclusion/exclusion manipulation
30. Pre-market / after-hours data – thin liquidity manipulation, news traps
31. Circuit filter hit history – repeated upper/lower circuit manipulation
32. Bid-ask spread history – illiquid stock steering, fake demand
33. Order cancellation ratios – spoofing, layering, quote stuffing
34. Latency / microstructure feeds – HFT abuse, momentum ignition
35. Delivery vs traded quantity mismatch – churn, circular volume
36. Insider buy/sell timing vs news – earnings leak, insider edge
37. Management interviews / media appearances – narrative pumping
38. Credit rating changes – hidden debt issues, distress dumping
39. Bank loan / debt covenant data – forced selling risk, promoter stress
40. Commodity price data – commodity-linked stock manipulation
41. Currency market data – FX-linked stock moves, export/import narrative manipulation

42. Peer stock correlation data – sector rotation rumors, sympathy pumps
43. Google Trends / search spikes – retail trap rallies, hype campaigns
44. App download / web traffic data – fake growth narratives
45. Employee review sites – hidden operational weakness vs pumped story
46. Satellite / alternative data – false production claims, reality check
47. Patent / legal filings – fake innovation stories
48. M&A databases – merger rumor validation or fake rumors
49. IPO allotment / grey market data – IPO listing rigging, SME hype
50. Registrar / transfer agent data – suspicious shareholder concentration
51. Related-party transaction disclosures – tunneling, governance fraud
52. Tax haven ownership records – proxy accounts, benami networks
53. Political donation / lobbying records – policy-driven speculation narratives
54. Sentiment analytics feeds – bot sentiment campaigns, coordinated narratives
55. Web scraping from forums – rumor origin detection
56. Unusual retail broker activity data – meme stock style squeezes
57. Margin debt data – leveraged frenzy, margin cascades
58. Securities lending / borrow fee data – short pressure, squeeze setup
59. Open-source whistleblower reports – fraud exposure, hidden risks
60. Historical enforcement case databases – pattern matching for known manipulation styles

Trusted Sources to Get Stock Manipulation News / Information:

1. Official Stock Exchange Websites (NSE, BSE, NYSE, NASDAQ, LSE etc.)
2. Regulator Websites (SEBI, SEC, FCA, ASIC etc.)

3. Exchange Surveillance Notices / Circulars
4. Corporate Filings Portals (annual reports, quarterly filings, disclosures)
5. Company Investor Relations Websites
6. Official Insider Trading Disclosure Portals
7. Shareholding Pattern Disclosure Platforms
8. Bulk Deal / Block Deal Official Reports
9. Government Financial Ministry Websites
10. Central Bank Websites (RBI, Federal Reserve, ECB etc.)
11. Trusted News Agencies (Reuters, Bloomberg, AP, Dow Jones)
12. Reputed Financial Media (CNBC, Financial Times, Wall Street Journal, Economic Times, Mint)
13. Exchange Approved Market Data Vendors
14. Refinitiv / LSEG Data Feeds
15. S&P Global Market Intelligence
16. Morningstar
17. FactSet
18. Bloomberg Terminal
19. Capital IQ
20. Official Mutual Fund / ETF Disclosure Websites
21. Credit Rating Agencies (CRISIL, ICRA, Moody's, S&P, Fitch)
22. Court / Legal Judgement Databases
23. Bankruptcy / Insolvency Official Portals
24. Government Tender / Contract Award Portals
25. Commodity Exchange Websites (MCX, CME etc.)
26. Currency Exchange / Forex Official Sources
27. Securities Lending / Borrow Official Data Sources
28. Options / Futures Official Derivatives Data
29. Official Economic Data Portals
30. Census / Statistics Government Websites
31. Auditor Reports filed officially
32. Registrar of Companies databases
33. Patent / Trademark Official Databases
34. Foreign Investment Disclosure Portals
35. Institutional Holding Disclosure Filings
36. ETF Provider Websites
37. Official Press Releases from Companies
38. Exchange Listed Event Calendars
39. IPO Prospectus Official Filings
40. M&A Official Announcements
41. Regulator Enforcement Orders / Penalties Database
42. Parliamentary / Congressional Public Records
43. Public Procurement Databases
44. Verified Earnings Call Transcripts Providers
45. Official Webcasts / Conference Calls
46. Professional Research Platforms (licensed)

47. University / Academic Finance Databases
48. Whistleblower Reports only if regulator-confirmed
49. Cross-verified data aggregators
50. Direct company filings + regulator cross-check combination

Most Trusted (Top Tier):

1. NSE / BSE / Exchange websites
2. SEBI / SEC regulator sites
3. Company official filings
4. Reuters / Bloomberg
5. Credit rating agencies
6. Court/legal records
7. Official market data feeds

Types to get Data:

1. Official API's / MCP's
2. Web Scraping / Crawling
3. RSS Feed Collection (Breaking News)
4. PDF / Document Ingestion
5. Social Media Listening

Tiers based on time:

- Tier 1 - Real Time
 - News APIs
 - RSS
 - Market feeds
- Tier 2 - Hourly
 - Exchange notices
 - Company filings
- Tier 3 - Daily
 - Legal
 - Economic reports
 - Ratings

Tier based approach:

T0 — Streaming (sub-second, push)

Push-based feeds delivered as events. Used for anything where milliseconds matter — trading signals, live market state, breaking wire alerts. Infra: WebSocket / FIX / Kafka. Latency target: under 500ms.

- NSE tick data, order book depth, market-by-order
- BSE tick data and depth
- NYSE / NASDAQ ticks (via Polygon, Databento, IEX Cloud, or direct)
- Live derivatives chain and Greeks
- Reuters / Refinitiv Real-Time wire
- Bloomberg B-PIPE
- Dow Jones DNA newswire (machine-readable)

T1 — Near-real-time (15 sec – 2 min poll)

Market-moving announcements. Aggressive polling during market hours, webhook subscriptions where the source supports them. Latency target: under 2 minutes.

- NSE corporate announcements page
- BSE corporate announcements page
- SEC EDGAR new filings index (especially 8-K, Form 4, 13D/G)
- Reuters / Bloomberg breaking news RSS
- PTI and ANI wire feeds
- X/Twitter — verified company handles, cashtags, IR accounts
- Telegram public channels (IR channels, tip channels for surveillance)
- StockTwits trending stream
- Earnings call live audio (when streamed)

T2 — Sub-hourly (5 – 15 min poll)

General news and active web sources. Standard journalism flow plus social commentary. Latency target: under 15 minutes.

- Indian news RSS — Economic Times, Mint, Moneycontrol, CNBC TV18, Business Standard, Livemint, Bloomberg Quint
- Global news RSS — Reuters.com, FT, WSJ, Bloomberg.com, CNBC
- Company investor-relations page diffs
- Reddit — r/IndianStockMarket, r/IndianStreetBets, r/wallstreetbets, r/investing
- StockTwits message stream by symbol
- YouTube finance channel new-upload polling
- Google News RSS per ticker
- SerpAPI / news aggregators for long-tail sources

T3 — Hourly

Regulatory, institutional, and legal sources. Important but not seconds-sensitive. Polled during business hours only. Latency target: under 1 hour.

- SEBI orders, circulars, enforcement actions
- MCA21 new filings index
- Credit rating press releases — CRISIL, ICRA, CARE, India Ratings, S&P, Moody's, Fitch
- IBBI insolvency orders
- NCLT and NCLAT daily orders
- Supreme Court and High Court judgments (corporate matters)
- Broker research note publication indexes
- Government ministry and PIB announcements
- RBI press releases and notifications
- Patent / trademark new application index

T4 — Daily (post-close batch)

End-of-day reconciliation, bulk data files, and reprocessing of the day's intra-day collection. Runs as scheduled Airflow / Prefect jobs after market close. Latency target: under 24 hours.

- NSE and BSE EOD bhavcopy (cash + F&O)
- NYSE / NASDAQ EOD files
- Shareholding pattern updates filed during the day
- FII / DII daily flows
- Bulk and block deal reports
- Insider trading disclosures (SAST, PIT, US Form 4 daily roll-up)
- Macro releases on scheduled days — CPI, WPI, IIP, GDP, PMI, trade data
- AMFI daily NAVs
- ETF daily holdings
- Mutual fund daily portfolios where disclosed
- Full re-parse of T1–T3 documents (entity tagging, sentiment, event extraction)
- Dedup and reconciliation jobs across news sources

T5 — Weekly / monthly

Periodic disclosures and slower reference data. Monthly cron with weekly checks for the high-churn sources. Latency target: under 1 week.

- 13F institutional holdings (US, quarterly with weekly polling around filing windows)
- Mutual fund monthly factsheets
- AMC portfolio disclosures (monthly, India)
- Patent and trademark database full sync
- Sector reports from CRISIL, ICRA, broker houses
- IMF, World Bank, OECD data refreshes
- Annual report archive sync (post AGM season)
- Sustainability / BRSR / ESG report ingestion
- SEBI quarterly bulletins
- Monthly FII / DII summary reports
- Index methodology updates

T6 — Static / reference (event-driven)

Foundational data that rarely changes. Refreshed when a corporate-action circular or exchange notice fires, plus a quarterly audit job to catch missed updates. Latency: as-needed.

- Entity master — NSE symbol, BSE scrip code, ISIN, MCA CIN, LEI, Bloomberg ticker, Reuters RIC, common aliases
- Sector / industry classification (NIC codes, GICS)
- Corporate action calendar — dividends, splits, bonuses, buybacks, mergers, demergers
- Listings and delistings

- Index constituents — Nifty 50/100/500, Sensex, sector indices, Bank Nifty
- Trading holiday calendar
- Trading hours, circuit limits, lot sizes for derivatives
- LEI registry
- Currency and country reference codes
- Directors and KMP master, board composition
